INTEGRATED LIVING SCIENCE ASSESSMENT

Creating Safer, Healthier, Comfortable, Energy-Efficient & Harmonious Living Environments

WHY LIVING SCIENCE?

Every family deserves a well-planned living environment. However, the quality of a home or living space depends not only on its appearance or construction, but also on how effectively its electrical systems, safety, energy, environment, ventilation, daylight, spatial planning and daily-life requirements work together.

FICOX Integrated Living Science Assessment is designed to evaluate these interconnected aspects of a residential or family-oriented living environment and identify practical opportunities for improvement.

Better Homes • Happier Families
A Sustainable Tomorrow

WHAT WE ASSESS

01 Electrical & Power Safety
- Load & wiring
- Earthing & protection
- Equipment placement
- Safety risks & future needs

02 Fire & Emergency Safety
- Fire-risk conditions
- Emergency access
- Fire protection provisions
- Preparedness

03 Natural Light & Ventilation
- Daylight availability
- Natural ventilation
- Air movement
- Spatial openness

04 Thermal & Living Comfort
- Heat-related concerns
- Building use patterns
- Comfort conditions
- Practical improvements

05 Energy Efficiency & Smart Energy Use
- Electricity consumption
- Appliances & HVAC
- Solar potential
- Energy-saving measures

06 Water & Environmental Management
- Water-use practices
- Wastewater & dampness
- Waste management
- Resource efficiency

07 Functional Space & Lifestyle Planning
- Space utilisation
- Movement & circulation
- Privacy & zoning
- Family & work/study needs

08 Green & Sustainable Living
- Energy conservation
- Renewable energy
- Sustainable materials
- Resource efficiency

09 Vastu / Vedic & Architectural Spatial Assessment (Optional)
- Orientation & zoning
- Room positioning
- Spatial harmony
- Traditional perspective

10 Integrated Living Improvement Plan
- Consolidated findings
- Practical priorities
- Actionable roadmap
- Long-term recommendations

OUR APPROACH

ASSESS → IDENTIFY → ANALYSE → PRIORITISE → SOLVE → IMPLEMENT → VERIFY

We identify existing concerns, understand their practical implications, prioritize improvements and develop an actionable roadmap according to the property's condition, requirements and selected scope of service.

IMPROVEMENT PRIORITIES

P1 Immediate / Critical
Safety or operational concern requiring prompt attention.

P2 High Priority
Important corrective action recommended.

P3 Improvement Recommended
Useful improvement for better performance, comfort or efficiency.

P4 Future Planning / Optimisation
Long-term improvement or future-development opportunity.

FOR EVERY TYPE OF FAMILY & PROPERTY

Essential Living Assessment
For essential safety, comfort and low-cost improvement opportunities.

Standard Living Assessment
For broader assessment of safety, energy, environment and functional living conditions.

Integrated Living Assessment
For comprehensive multidisciplinary assessment.

Premium / New-Project Consultancy
For new construction, renovation and premium projects, integrated from planning and design stage.

OUR OBJECTIVE

To make better-planned, safer, healthier, more comfortable and sustainable living environments accessible across different sections of society through a practical and multidisciplinary approach.

Same Living Science — Different Service Depth.

The technical assessment remains evidence- and requirement-based, while the scope and depth of consultancy can be selected according to the client's property, objectives and budget.

FICOX INTEGRATED LIVING SCIENCE

Electrical Architecture Engineering → Fire Safety → Energy → Environment → Green Technology Technology → Functional Space Planning → Vastu/Vedic Spatial Assessment

From Individual Homes to Integrated Sustainable Projects
